

Aim

To design a simple mobile prototype of a Bus Ticket Booking System using Figma that allows users to search buses, select seats, enter passenger details, and confirm a bus ticket through an easy-to-use interface.

Procedure

- Open Figma
- Create the Home Screen
- Design the Bus List Screen
- Create the Seat Selection Screen
- Create the Passenger Details Screen
- Create the Booking Confirmation Screen
- Add Prototype Interactions
- Test the Prototype
- Save the Prototype

Output

Aim

To design a simple interactive prototype for an E-Commerce mobile application using Figma to present different user interface ideas to stakeholders, collect their feedback, resolve conflicting design preferences, and obtain approval for the final interface.

Procedure

- Open Figma
- Design the Home Screen
- Design the Product Listing Screen
- Design the Product Details Screen
- Design the Shopping Cart Screen
- Design the Checkout Screen
- Create Different UI Variations
- Create Prototype Interactions

Output
